

**AMENDMENT #15
TO
CONTRACT NUMBER VA-171023-ATM
BETWEEN THE
VIRGINIA INFORMATION TECHNOLOGIES AGENCY
ON BEHALF OF
THE COMMONWEALTH OF VIRGINIA
AND
AT&T MOBILITY NATIONAL ACCOUNTS LLC**

This Amendment No. 15 ("Amendment 15") is entered into as of October 4, 2021 (the "Amendment 15 Effective Date") by and between AT&T Mobility National Accounts LLC ("Supplier") and the Virginia Information Technologies Agency on behalf of the Commonwealth of Virginia ("VITA") (VITA and Supplier are, at times, referred to herein individually as a "Party" or together as the "Parties").

Section 1. Recitals.

1.1 Supplier and VITA entered into that certain Wireless Services and Equipment Contract No. VA-171023-ATM, dated November 13, 2017, as amended (the "Contract").

1.2 Supplier and VITA intend to make certain changes to the Contract in accordance with the terms and conditions of this Amendment 15.

Section 2. Agreement. In consideration of the recitals set forth in §1 of Amendment 15 above, which are hereby re-stated and agreed to by the Parties, and for valuable consideration, the receipt and sufficiency of which is hereby acknowledged by the Parties, Supplier and VITA hereby agree to amend the Contract pursuant to the terms and conditions of this Amendment 15. Unless otherwise defined, capitalized terms in this Amendment 15 have the meanings ascribed to them in the Contract.

Section 3. AT&T FirstNet Push-To-Talk. Supplier will provide VITA and its qualified users with AT&T FirstNet Push-To-Talk ("AT&T FirstNet PTT") pursuant to the terms and conditions of the Contract, and this Amendment 15 including, without limitation, the Sales Information for AT&T FirstNet PTT, attached hereto and incorporated herein as Exhibit A (the "AT&T FirstNet Push-To-Talk Sales Information"). VITA acknowledges and agrees that AT&T FirstNet PTT is subject to the terms and conditions set forth in the AT&T FirstNet PTT Sales Information. AT&T FirstNet PTT (a) is NOT eligible for the MSC Service Discount; and (b) is available for the term of Contract. If there is any material conflict between the terms of the Sales Information and the terms of this Amendment 15, then the terms of this Amendment 15 take precedence. The Parties acknowledge and agree that §11 of Exhibit A of the Contract – "Service Fees", attached hereto as Exhibit B, to the is hereby modified to include the following:

FIRSTNET EPTT LMR PLANS

LMR ONLY Plan	\$27.00 Monthly Service Charge
LMR INTEROP BOLT-ON PLAN	\$5.00 Monthly Service Charge
ROIP SITE FEE	\$2,500.00 One Time Charge
ROIP Gateway Credential	\$0.00 Charge
FirstNet Unlimited Plan for Backhaul	\$40.00 Monthly Service Charge
EPTT Wifi Only	\$10.00 Monthly Service Charge
Cross Carrier	\$10.00 Monthly Service Charge
Web Dispatch	\$30.00 Monthly Service Charge

Section 4. Restatement of Contract. The terms and conditions of the Contract, as modified by this Amendment 15, are hereby re-stated and ratified by Supplier and VITA. All such terms and conditions are and will continue to remain in full force and effect.

IN WITNESS WHEREOF, the Parties have duly executed this Amendment 15 as of the Amendment 15 Effective Date.

EXHIBIT A – AT&T FirstNet Push-To-Talk

(A true and correct copy of AT&T's FirstNet Push-To-Talk Sales Information Product Brief follows this page)

FirstNet® Push-to-Talk

Powered By 3GPP Mission Critical Technology

Reliable communication is critical for first responders and those who support them. You need to collaborate with your team and other agencies for an effective response. In a fast-changing situation, you need quick access to information so you can make informed decisions. FirstNet Push-to-Talk (PTT) is the communications tool you need to help you meet these critical needs.

Mission-Critical Standards

We've built FirstNet PTT based on the public safety standards set by the Third Generation Partnership Project (3GPP). This is the body responsible for LTE and 5G global standards. In addition to voice services, FirstNet PTT supports messaging and file sharing built to the Mission Critical Data standards, and in the future will support streaming video built to the Mission Critical Video standards. When situational awareness matters, sharing images or documents, or streaming video will give your team access to the detailed and timely information they need for enhanced decision making.

PTT Service on FirstNet

First Responders on FirstNet already receive First Priority™, which provides QoS, priority and preemption that exceed anything previously available to public safety. But with FirstNet PTT, we've given public safety PTT users the highest priority on the network¹. So, in addition to getting priority and preemption on non-PTT calls, PTT calling will receive

the highest level of priority¹ for dependable, high performance group communications.

And FirstNet PTT is built right into the core of the FirstNet network. With PTT servers in six data centers across the country, your calls will be routed through the nearest node. This provides lower latency and faster access. We've designed this service and the data centers for redundancy during an outage. Engineered to the key performance indicators defined by the global standard, FirstNet PTT delivers low latency and high availability, resulting in superior calling performance.

In addition, FirstNet PTT provides:

- 1-to-1 calling
- Group calling
- Presence, so you can see who is online
- Up to 1,000 users per talkgroup (subject to network capacity)
- Ability to make emergency calls (which preempt other PTT calls) and to send emergency alerts
- Text messaging to groups or individuals
- Share images, video clips, documents or other files with the team
- Supervisory override, allowing a selected user to be prioritized in the queue while others are waiting to place a call
- Mutual aid capabilities, so you can request aid from another agency on the service

¹ Other than mandated emergency calling.

FIRSTNET PTT BENEFITS

- High reliability and performance
- Expand where you can work
- Expand who you can work with
- Communicate seamlessly between FirstNet PTT and LMR users
- Free up LMR capacity and extend coverage at a lower cost
- Richer team communication with multimedia file sharing
- Enhanced situational awareness

Expand where you work and who you work with

Nationwide coverage: The FirstNet wireless network will reach 99% of Americans. So you can operate beyond your existing Land Mobile Radio (LMR) footprint.

Automated Mutual Aid: For help during day-to-day operations, planned events, or emergency incidents, you can send requests for resources to another agency that uses the Solution. Once you receive approval, you can see the other agency's resources in your admin tool. Then you can include them in your talkgroups to help during mutual aid efforts.

LMR to LTE interoperability: Your FirstNet PTT users can communicate seamlessly with users on your LMR network. This will help you improve productivity, free up LMR capacity and extend your operational reach at a lower cost.

Devices, apps and accessories

FirstNet PTT is supported on a broad selection of FirstNet Ready™ Android 4G LTE devices. This selection includes smartphones, feature phones, and ultra-rugged devices and depending on the manufacturer and device, supports:

- Dedicated buttons for PTT calling or declaring an emergency
- Ruggedized hardware
- Embedded PTT clients that are integrated into the device's operating system
- PTT traffic prioritization on the device, helping deliver superior calling performance
- Diverse accessory options

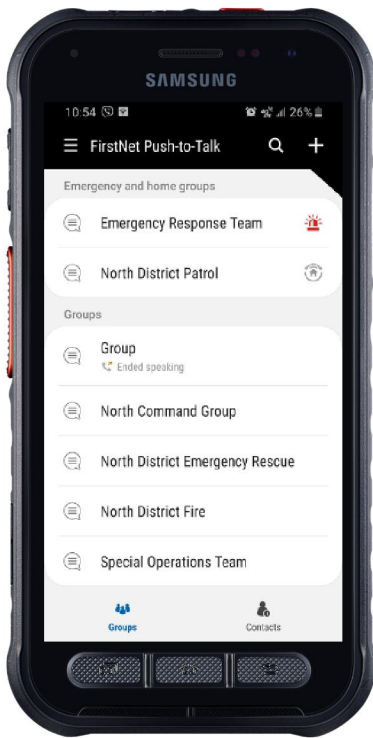

This broad selection is designed to meet the needs of our customers - from first responders who need rugged PTT-centric devices to supporting team members using existing smartphones. Note that FirstNet PTT for iOS smartphones is under development.

All devices that support FirstNet PTT are tested and certified through the FirstNet device approval process. So you can buy with peace of mind. See the list of supported devices at firstnet.com/push-to-talk/support.

FirstNet Push-to-Talk

Powered By 3GPP Mission Critical Technology

FirstNet PTT Groups Tab

USE CASE 1

The Challenge

An LMR network deployed several years ago by an agency is nearing capacity due to the growth in users.

The Solution

Use LMR capacity for first responders and move those who support them to FirstNet PTT. Implement LMR to LTE interoperability to maintain seamless communication.

The Benefit

Extend the life of the LMR network asset by freeing up LMR capacity with LTE-based PTT.

Beyond Voice

Public safety users are already familiar in their personal lives with the value of mobile communication options such as texting, picture messaging, or sending a video clip. While voice remains primary for FirstNet PTT users, texting and file share (and later streaming video), built to the mission critical standards, allows public safety users to share rich and detailed information which may be impractical to share via other means. Afforded the highest priority of any data service on the network and built for robust reliability, sharing of multimedia files enables greater situational awareness and more informed decision making.

Specifically, file sharing on FirstNet PTT supports:

- Multiple file types (e.g. images, video, audio, text, Microsoft Office, PDF)
- File sizes of up to 100MB
- AES 256 bit encryption

Other roadmap items aimed at delivering flexibility, enhanced resources and greater situational awareness are planned. We're working to expand the offer to include:

- Streaming video: Send and receive near real-time streaming video with users in your group, either 1:1 or from external sources
- Location, so you can see nearby responders or utilities
- User checks, to monitor signal and battery strength
- Ambient listening, so authorized administrators can hear what is happening in the areas around the device of a team member
- Dispatch application, for more effective resource management
- Wi-Fi calling - PTT calling over Wi-Fi networks
- Direct Mode, which supports:
 - Off-network communications
 - Group and 1:1 calling
 - Relay capability that connects to users not on the network

As the standards evolve, FirstNet PTT will evolve with them.

LMR to LTE Interoperability

Public safety entities can:

- Establish interoperability between LTE PTT users and existing LMR users
- Communicate with team members and personnel traveling outside the agency's LMR footprint.
- Free up capacity on an LMR network nearing its limits

To set up LMR-LTE interoperability with a Radio over IP Gateway (RoIP), you'll need to connect the gateway with a donor two-way radio, cabling and secured backhaul to the FirstNet PTT service. For backhaul connectivity to the FirstNet PTT platform you can use:

- Wireless data, using a FirstNet Mobile Unlimited Plan with First Priority®, to access the FirstNet PTT service, or
- An internet connection using a VPN to access FirstNet PTT (when available)

Separate charges for backhaul apply. Customer premise equipment sold by third parties and maybe billed by AT&T.

FirstNet Push-to-Talk

Powered By 3GPP Mission Critical Technology

Managing Your Service

Your administrator can manage existing users and FirstNet PTT usage through FirstNet Central. Administrators can create talk groups and contacts and push them to devices in near real-time. This helps to eliminate the need to physically configure individual devices.

Administrators can request Mutual Aid from other agencies and manage their users as simply as they manage their own, using the PTT Administration Tool.

And agencies that need help setting up FirstNet PTT can request the PTT Customer Administration Set Up and Training (CAST) service at no extra cost*. PTT CAST provides online, orientation courses on the PTT Admin Tool.

Security

FirstNet PTT is a highly secure 3GPP MCPTT compliant solution designed to meet the needs of first responders. The FirstNet network applies standard 128-bit LTE wireless encryption. In addition, FirstNet PTT applies Advanced Encryption Standard (AES)-256-bit encryption to voice, data and video.

Pricing

All prices exclude applicable taxes, fees, and surcharges. All fees paid are non-refundable.

USE CASE 2

The Challenge

A fast-moving wildfire threatens residents, homes, livestock and businesses as it approaches a large urban area. The local fire department needs to coordinate emergency response with neighboring fire departments, police, EMS and national guard to notify or evacuate impacted areas.

The Solution

With FirstNet PTT, the fire department dynamically sends mutual aid requests to other emergency response agencies that are also on the FirstNet PTT platform. Once approved, resources from these partner agencies are added to mutual talkgroups that allow immediate inter-agency communication.

The Benefit

Easy interoperability on the FirstNet PTT platform with other agencies allows tight coordination for an effective response and helps keep the community safe.

Plan	Description	Monthly Recurring Charge
FirstNet PTT Subscription ¹	Unlimited FirstNet PTT use ²	\$10
FirstNet PTT Only Rate Plan for Feature Phones ³	FirstNet PTT Rate plan for feature phones. Provides unlimited FirstNet PTT use, but no mobile voice or data service	\$27 for users of subsidized devices \$19 for users of unsubsidized devices
FirstNet PTT LMR Interoperability Add-On ^{4,5}	Unlimited communication between FirstNet PTT users and LMR users	\$5
FirstNet PTT LMR Interop Site License Fee	Site licensing fee for each RoIP Gateway	\$2500 (one time charge)
FirstNet Mobile Unlimited Plan	Wireless backhaul from RoIP Gateway to FirstNet PTT core	\$40/line
First Priority [®] for FirstNet Mobile Unlimited Plan	<ul style="list-style-type: none">• Primary User• Extended Primary User	<ul style="list-style-type: none">• No incremental charge• \$7.50/line

(1) Requires use of a FirstNet capable device and an existing qualified FirstNet wireless rate plan. Not eligible for contract-based discounts.

(2) "Unlimited" applies to use of FirstNet Push-to-Talk on AT&T's U.S. domestic wireless data network footprint (including supported domestic roaming partners with a connection to the FirstNet Core). Such FirstNet PTT usage does not count as part of the usage or data allowance under FirstNet Wireless voice or data plans. Use of FirstNet PTT while roaming on partners who do not have a connection to the FirstNet Core is not supported.

(3) For full information, review the FirstNet PTT Only Rate Plan for Feature Phones at firstnet.com/mission-critical/firstnet-push-to-talk/rate-plans.html.

(4) Requires a FirstNet PTT subscription.

(5) Requires installation of customer owned and operated equipment.

*Limited time offer; may be withdrawn at any time

FirstNet Push-to-Talk

Powered By 3GPP Mission Critical Technology

Important Information

General - FirstNet Push-to-Talk (PTT), as described in this product brief (the "Solution") is available only to eligible customers with a qualified agreement ("Qualified Agreement"). The Solution is subject to (a) the terms and conditions found at www.firstnet.com/push-to-talk/blue/eula ("Additional Product Terms"), (b) the Qualified Agreement; and (c) applicable Sales Information. For government customers, any Additional Product Terms not allowable under applicable law will not apply, and the Qualified Agreement will control in the event of any material conflict between the Qualified Agreement and the Additional Product Terms. The Solution is available to FirstNet Public Safety Entities, their Agency Paid Users and their Subscriber Paid Users with a qualified FirstNet rate plan and a FirstNet PTT subscription, or with the FirstNet PTT Only Rate Plan for Feature Phones. The Solution may not be available for purchase in all sales channels or in all areas and may not be accessible at all times. Additional hardware, software, service and/or network connections may be required to access the Solution. Availability, accessibility, security, delivery, speed, timeliness, accuracy, and reliability are not guaranteed by AT&T.

Requirements - The Solution requires LTE wireless connectivity on the AT&T cellular network and the use of a supported wireless device. The FirstNet PTT client may already be installed on a supported wireless device. If not and when available, use of the Solution on supported feature phones, smartphones and tablet devices requires download and installation of the FirstNet PTT client software onto such devices. Management of the service via the Administration Tool requires the use of a supported browser on a suitable computing device. Use of the Solution requires a subscription to FirstNet PTT and a qualified FirstNet rate plan, or with the FirstNet PTT Only Rate Plan for Feature Phones. Data service/plan requirements vary by device category. Subscribers must have a FirstNet SIM card to use the PTT Solution, unless an exception has been granted. Subscribers who do not use a FirstNet SIM card will have limited or no access to the capabilities of the Solution.

Customers that wish to use the LMR to LTE interoperability capabilities of the Solution are required to purchase additional third-party equipment to complete the connections, which may include Radio over IP gateway equipment and software licenses and secured IP connectivity between the Customer's location(s) and AT&T data centers, which may include wired Internet or wireless data connectivity.

Technical - PTT is not compatible with traditional circuit-switched voice calls or certain other FirstNet wireless services, including, without limitation, voice mail/Visual Voice Mail, AT&T Address Book, and Wireless Priority Service.

Wireless data coverage is not available in some areas. Wireless data coverage is subject to transmission limitations and terrain, system, capacity and other limitations. FirstNet PTT service is not available in areas served by certain Small Cell sites. Usage of the Solution on AT&T domestic roaming partners is dependent on the roaming partner having connectivity to the FirstNet Core.

When operating on such roaming partners' networks, subscribed devices will indicate the service provider as AT&T or FirstNet. When roaming with domestic or international roaming partners that do not display AT&T or

FirstNet as the service provider, FirstNet PTT service will not be available. If you are able to use FirstNet PTT while roaming on such partners' networks, you will not receive traffic prioritization and other features of the Solution. Use of FirstNet PTT while roaming internationally will be charged at AT&T's standard international roaming rates. The Solution may not work if a User attempts to access it via a custom Access Point Name (APN), and it will not work if accessed through a firewall or a VPN or from a network that does not meet the specified network access criteria.

The PTT application must be installed on a FirstNet certified device, and the device must be activated and turned on in order to originate and or receive PTT calls. Use of non-certified devices is not supported. A list of certified devices is available at www.firstnet.com/push-to-talk/support, which is subject to change. Not all service features and functionality, including prioritization on specific feature phones, are available on all certified devices. Other software on a User's device may impair the PTT Solution's performance. The Solution is not compatible with devices provisioned through the Control Center platforms. See a FirstNet representative for details.

Usage - Data service/plan requirements vary by device category. Data usage incurred by FirstNet subscribers within AT&T's U.S. domestic wireless data network footprint (including supported domestic roaming partners) in connection with the Solution will not be charged against the Customer's associated data plan. All other data usage will be charged at AT&T's scheduled rates.

Customer and its Users must accept the Additional Product Terms prior to installation and/or use of the Solution's software. Customer must accept the Additional Product Terms as the party liable for each Agency Paid and Subscriber Paid User and agrees that such Users will comply with the obligations under those terms. Customer is responsible for providing each Agency Paid User of a subscribed mobile device with a copy of the Additional Product Terms. The Customer and its Agency Paid Users are individually and jointly liable thereunder. Unless otherwise prohibited, this offer is subject to change, and may be modified, terminated, or discontinued at any time without notice.

Data Privacy - Customer must comply with all applicable privacy, consumer data protection laws, marketing and data best practices, and all laws that apply to collecting, accessing, storing, processing, using, disclosing and securing user data, including any obligations to notify and obtain consents of Users regarding any Customer or AT&T access to Users' personal information. Use of the Mutual Aid request feature gives Customers the ability to see the identity of other Solution Users and, if approved by the other customer, its users. Similarly, the identity of Customer will be visible to other customers, and Customer may make available the identity of its Users.

AT&T may use and distribute information regarding the use of the Solution both internally and to its pertinent suppliers to provide the Solution, in order to improve its product performance or to develop new products. Use of the Solution constitutes consent to AT&T's limited use and distribution of Customers' Solution information. The collection and use of such information is governed by the FirstNet Privacy Policy found at: <https://www.firstnet.com/privacy-policy>.

FirstNet PTT, powered by 3GPP Mission Critical technology, gives you high performance, high availability PTT calling on a nationwide LTE network. Rich future capabilities will provide you relevant information so you can make informed decisions and help keep your community safe.

For more information, contact your FirstNet Solutions Consultant or visit www.firstnet.com/push-to-talk.

EXHIBIT B – SERVICE FEES

1. Effective Date

The effective billing date for new lines of services and existing customers transitioning to new rate plans shall be the date of order.

2. Basic Pay-As-You-Go Voice Only Plan

Plan	Supported Devices	Included Voice Minutes	Included LTE/4G Data	Additional Data (1X Speed)	MRC Cost Per Line
National Flat Rate	Feature	None	None	NA	\$8.16

- No Additional discounts apply
- Text, Picture and Video Messaging and Data service are Blocked as a Default on this plan
- All Voice Minutes are billed at \$0.15 per minute.
- Text, Picture and Video Messages are billed at \$0.30 ea. (Text) and \$0.40 (Pic) (Incoming and Outgoing)
- Unlimited Business Messaging may be added to this plan

3. Pooled Voice Plans

Plan	Supported Devices	Included Voice Minutes	Included LTE/4G Data	MRC Cost Per Line
Add a Line	All	0	None	\$15.99
300 Min Pooled	All	300	None	\$20.80
450 Min Pooled	All	450	None	\$24.47
900 Min Pooled	All	900	None	\$32.63
Unlimited Voice	All	Unlimited	None	\$33.65

- Price plans are based on individual lines, but are pooled at the account level
- Unlimited Voice plan does not participate in the pool
- Unlimited Text and Picture messaging included on all above plans
- Voice Overage charge for the pool is \$0.10 per minute
- Roaming to Mexico included

4. Pooled Voice and Data Plans

Plan	Supported Devices	Included Voice Minutes	Included LTE/4G Data	MRC Cost Per Line
Add a Line	All	0	Unlimited	\$36.71
300 Min Pooled	All	300	Unlimited	\$43.85
450 Min Pooled	All	450	Unlimited	\$45.89
900 Min Pooled	All	900	Unlimited	\$55.07
Unlimited Voice	All	Unlimited	Unlimited	\$56.09

- Price plans are based on individual lines, but are pooled at the account level
- Unlimited Text and Picture messaging included on all above plans
- The Unlimited Voice plan does not participate in the pool
- Roaming to Mexico included

5. Data Plans

Plan	Included Voice Minutes	Included LTE/4G Data	MRC Cost Per Line	Overage Cost
2GB Pooled	None	2GB	\$20.80	\$10/GB
22GB Throttled	None	22GB	\$36.71	N/A
Unlimited Un-Throttled	None	Unlimited	\$38.75	N/A
Business Pooled Nation Data Plan	None	1GB	\$15.30	\$10.00/GB
Business Pooled Nation Data Plan	None	2GB	\$25.50	\$10.00/GB

Custom Mobile Select INDV Tablet/MiFi USB 10GB Plan	None	10GB	\$17.50	N/A
Custom Mobile Select INDV Tablet/MiFi USB 10GB Plan is subject to the terms and conditions for K-12 Students incorporated in the Agreement. The Custom Mobile Select INDV Tablet/MiFi USB 10GB is only available to K-12 Students. Activation credits and promotions are not available with the Custom Tablet Plan. Equipment (tablets) for use with the Custom Tablet Plan will be purchased at the full retail price. Supplier may temporarily slow data speeds if network is busy.				

- The above plan is for Devices supporting DATA (Smartphones, Tablet, Aircard, modem, router, MiFi, etc.)
- Data will be throttled on the 22GB Throttled plan to 3G data speeds after 4G data limit is reached
- Text Messaging is Blocked on the above plans unless these are added to a rate plan that already includes messaging or Unlimited Business Messaging is selected for the device.

6. International Feature Add-on

Plan	Included Text Messaging	Included Data	MRC Cost Per Line	Voice Calls Per Minute	Data Overage Charge
World Connect	None	None	\$5.00	NA	NA
Passport	Unlimited	2GB	\$70.00	\$0.35	\$30.00/GB
Passport	Unlimited	6GB	\$140.00	\$0.35	\$30.00/GB

Pay-Per-Use-Rates

Talk		Text		Data	
Canada/Mexico	\$1.00/min	Text	\$0.50/text	On Land	\$2.05/MB (\$0.002/KB)
Europe	\$2.00/min	Picture and Video	\$1.30/msg	Cruise Ships	\$2.05/MB (\$0.002/KB)
Rest of the World	\$3.00/min	Standard domestic messaging rates apply to text, picture and video messages received.			
Cruise Ships	\$3.00/min			Usage is calculated in full-kilobyte increments and is rounded up to the next full-kilobyte increment.	

AT&T International Day Pass Plan

Daily Recurring Charge	\$10.00
Data from your plan	In included countries
Talk	Unlimited
Text	Unlimited

- These Features may be added to any Voice and Data Bundle
- No Voice Minutes are included
- World Connect provides discounted International calling from the US, Puerto Rico, and the US Virgin Islands to selected countries. Details can be found at att.com/Worldconnect

7. AT&T Global Smart Message Suite

	Included Monthly Outbound Text Messages	Included Monthly Picture (MMS) Messages	Monthly Recurring Charge (MRC)	Overage Text Message	Overage MMS Message
GSMS	10,000	0	\$880	\$0.025	\$0.13
GSMS Toll Free License	N/A	N/A	\$25.00	N/A	N/A

- No further discounts included
- A One-Time Setup Fee of \$3,300 is required
- Price includes all standard advertised feature of the Suite, including API

8. Machine to Machine (Telemetry)

M2M Data Plan Name	Included Data	MRC	Overage
M2M Pooled Data 1mb	1mb	\$3.06	\$2.00/mb
M2M Pooled Data 2mb	2mb	\$4.08	\$2.00/mb
M2M Pooled Data 5mb	5mb	\$5.10	\$2.00/mb
M2M Pooled Data 10mb	10mb	\$6.12	\$2.00/mb
M2M Pooled Data 250mb	250mb	\$12.24	\$2.00/mb

- M2M plans are not eligible for further discounts
- Text Messages (SMS) to on the 1mb plan devices are billed at \$0.30 each, MMS at \$0.40 each
- M2M plans are provisioned for the highest data rate (LTE/3g/2g) available in the service location

9. Optional Features

Unlimited Tethering	\$10.20 mo.
ePTT for National Flat Rate Plan	\$4.49 mo.
ePTT Only (no voice or data plan required)	\$18.31 mo.
ePTT add-on	\$2.04 mo.
Unlimited Business Messaging (For National Flat Rate Plan)	\$2.45 mo.
ePTT add-on for tablets	\$15.00 mo.

- Optional Features are not eligible for further discounts
- Unless stated all costs are per month, per line

10. Taxes, Fees, and Surcharges

Pricing in this Exhibit A does not include applicable taxes, fees or surcharges (collectively “fees”). Fees vary by state and local areas and are subject to change without notice. Applicable taxes, fees and surcharges include, but are not limited to, the following

Federal Universal Service Fund Domestic	\$10.20 mo.
Federal Universal Service Fund Surcharge International	\$13.77 mo.
Regulatory Cost Recovery Charge	\$18.31 mo.
Administrative Fee	\$3.05 mo.
Other fees and surcharges	\$2.55 mo.

11. FirstNet Plans

FIRSTNET MOBILE-UNLIMITED PLANS

	Unlimited Enhanced for Smartphones	Unlimited Standard for Smartphones	Unlimited for Data-only Devices
Monthly Service Charge	\$45.89	\$40.79	\$37.73

FIRSTNET MOBILE-POOLED DATA PLANS

	Pooled Data for Feature phones, for use with a subsidized device Add-A-Line	Pooled Data for Data-only Devices, for use with a subsidized device 2GB	Pooled Data for Data-only Devices, for use with a subsidized device 5GB
Monthly Service Charge*	\$25.49	\$26.51	\$33.65

FIRSTNET MOBILE-POOLED PLANS FOR FEATURE PHONES

Monthly Service Charge	\$22.00 MSC	\$26.51 MSC	\$33.65 MSC	\$230.00 MSC	\$415.00 MSC	\$1,920.00 MSC	\$3,685.00 MSC

12. Public Static IP Address

Public Static IP Address	\$3.00 Per month
Private Mobile Connection Custom APN Design	\$500.00
Private Mobile Connection Public Static IP Design	\$500.00
Excludes any set-up charges. Limited to thirty (30) public static IP addresses except when otherwise agreed to by Supplier. Customer assumes all responsibility for the security of its wireless devices assigned to a public static IP address. A public static IP address cannot be assigned to any wireless device using any unlimited wireless data plan, unless otherwise agreed to in writing by the Parties. Customer does not own, nor has any property interest in, a public static IP address assigned to any wireless device. IP addresses are assigned randomly. Supplier shall have an unrestricted right to reclaim and/or reassign any public static IP address if the SIM on an associated wireless device is deactivated or if the public static IP address remains unused for 12 months. Due to systems limitations, CRUs on rate plans associated with a wireless device assigned to a public static IP address will not receive data usage alerts.	

13. OPTIONAL CONTENT FILTERING APPLICATIONS

AccessMyLan	\$6.50/month
Enterprise Traffic Protector	\$1.00/month

14. Student ELearning Offer

Student eLearning Offer with Enterprise Traffic Protector

Plan	Monthly Service Charge
AT&T Special DataConnect for Education Plan	\$14.00
Enterprise Traffic Protector	\$1.00
AccessMyLan™	\$6.00
