

**AMENDMENT #21 TO  
 CONTRACT NUMBER VA-171023-ATM  
 BETWEEN THE  
 VIRGINIA INFORMATION TECHNOLOGIES AGENCY  
 ON BEHALF OF  
 THE COMMONWEALTH OF VIRGINIA  
 AND  
 AT&T MOBILITY NATIONAL ACCOUNTS LLC**

This Amendment No. 21 (“Amendment 21”) by and between AT&T Mobility National Accounts LLC (“Supplier”) and the Virginia Information Technologies Agency on behalf of the Commonwealth of Virginia (“VITA”) is effective when signed by both Vita and Supplier (the “Amendment 21 Effective Date”). VITA and Supplier are, at times, referred to herein individually as a “Party” or together as the “Parties”.

**Section 1. Recitals.**

**1.1** Supplier and VITA entered into that certain Wireless Services and Equipment Contract No. VA-171023-ATM, dated November 13, 2017, as amended (the “Contract”).

**1.2** Supplier and VITA intend to make certain changes to the Contract in accordance with the terms and conditions of this Amendment 21.

**Section 2. Agreement.** In consideration of the recitals set forth in §1 of Amendment 21 above, which are hereby re-stated and agreed to by the Parties, and for valuable consideration, the receipt and sufficiency of which is hereby acknowledged by the Parties, Supplier and VITA hereby agree to amend the Contract pursuant to the terms and conditions of this Amendment 21. Unless otherwise defined, capitalized terms in this Amendment 21 have the meanings ascribed to them in the Contract.

**Section 3. AT&T Wireless Broadband.** VITA and Suppler agree that Supplier will provide VITA and its qualified users the AT&T Wireless Broadband Service from AT&T (“Wireless Broadband”) pursuant to the terms and conditions of the Contract, this Amendment 21, and the corresponding Sales Information for AT&T Wireless Broadband attached hereto and incorporated herein as Exhibit A (the “Sales Information”). Wireless Broadband (a) is NOT eligible for the MSC Service Discount; and (b) is available for the term of Contract. If there is any material conflict between the terms of the Sales Information and the terms of Amendment 21, then the terms of Amendment 21 take precedence.

**3.1 Wireless Broadband Pricing**

<b>AT&amp;T Wireless Broadband Pricing</b>				
<b>Plan</b>	<b>Monthly Recurring Charge</b>	<b>Data</b>	<b>Data Restrictions</b>	<b>AT&amp;T Business Fast Track allowance</b>
AT&T Wireless Broadband Core	\$42.50	Unlimited	Data speed up to 25 Mbps. After 100GB. AT&T may temporarily slow data speeds if the network is busy.	15GB
AT&T Wireless Broadband Pro	\$47.50	Unlimited	Data speed up to 50 Mbps. After 125GB. AT&T may temporarily slow data speeds if the network is busy.	30GB
AT&T Wireless Broadband Ultra	\$52.50	Unlimited	Data speed up to 100 Mbps. After 175GB. AT&T may temporarily slow data speeds if the network is busy.	50GB

**Section 4. Restatement of Contract.** The terms and conditions of the Contract, as modified by this Amendment 21, are hereby re-stated and ratified by Supplier and VITA. All such terms and conditions are and will continue to remain in full force and effect.

IN WITNESS WHEREOF, the Parties have duly executed Amendment 21 as of the Amendment 21 Effective Date.

[IMMEDIATELY FOLLOWS THIS PAGE]

# AT&T Wireless Broadband

*Get budget-friendly wireless data for your business.*

AT&T Wireless Broadband is a wireless data service that features a flat monthly rate with no overage charges. AT&T Wireless Broadband offers three rate plan options: Core (with data speeds up to 25Mbps), Pro (with data speeds up to 50Mbps), and Ultra (with data speeds up to 100Mbps).

The plans provide wireless data connectivity for compatible 4G LTE or 5G/5G+ routers and mobile hotspot devices. Whether used as the primary or failover service, our AT&T Wireless Broadband plans can provide a cost-effective alternative for critical applications, a diverse data backup option, or a quick deployment connection for new or remote locations.

AT&T Wireless Broadband can give you additional bandwidth to run your most important programs, such as point-of-sale, electronic time clocks, and cloud-based applications. This can free your wired network for other uses, like guest Wi-Fi. AT&T Wireless Broadband can also provide a wireless connection to keep your digital signage up to date economically.

## How It Works

AT&T Wireless Broadband plans use an AT&T SIM card that you install in your router or hotspot device (sold separately) to access the AT&T wireless network. The plans have different maximum speeds. All plans include an AT&T Business Fast Track allowance. Business Fast Track enables a differentiated (enhanced versus "best effort") network experience for eligible business data originating on and traveling over the AT&T-owned domestic 4G LTE network, which can be a benefit when the network is congested.

## Needs

You've told us you have the following needs:

- **Access**—Gain and maintain access to the vital information and communications resources needed for success. You need an alternative to wired internet access.

- **Cost Control**—Implement a system that can deliver valuable features without dramatically increasing the costs. You want your monthly overhead expenses to be predictable and manageable.

## Features and Benefits

AT&T Wireless Broadband gives you these features:

- **Rate Plan Options** let you choose from three different speed tiers (AT&T Wireless Broadband Core is up to 25Mbps, AT&T Wireless Broadband Pro is up to 50Mbps, and AT&T Wireless Broadband Ultra is up to 100Mbps), all at flat monthly rates with no overage charges. See applicable equipment and plan requirements in the Important Information/Legal Notices section. You can also get a \$5/month discount on the monthly plan charge if you sign up for AutoPay and paperless bill discount (discount is applied within two bills). So, you can choose the speed you need and pay one flat, monthly rate regardless of how much data you use.
- **5G/5G+ Access** is available with a 5G/5G+ device and plan. 5G service isn't available everywhere; 5G+ service is only available in limited parts of select cities. The plans have maximum data speeds, which may not enable you to experience the highest available speeds when accessing 5G/5G+ services (other restrictions apply; see network access and coverage disclaimers in the Important Information/Legal Notices section).
- **AT&T Business Fast Track** uses quality of service (QoS) technology to provide an enhanced (versus "best effort") network experience for (depending on your plan) the first 15GB, 30GB, or 50GB per month of eligible data traffic originating on and traversing over the AT&T domestic 4G LTE network (excluding microcells, AT&T Wi-Fi service, and roaming partner networks). This feature can benefit you during times of network congestion (see AT&T Business Fast Track allowance disclaimers in the Important Information/Legal Notices section).

## Customer and Industry Uses

Following are some ways you might use AT&T Wireless Broadband:

- **Highly Secure ATM-to-Data Center Connections**

Your bank needs to connect ATMs in diverse locations to your data center. This connection must be highly secure and reliable, but using fixed-line connections would be expensive and logistically difficult in many of these locations.

To efficiently provide data connections to your ATMs, we suggest a router with a cellular data connection.

AT&T Wireless Broadband offers internet connectivity with rate plan options providing speeds up to 25Mbps, up to 50Mbps, or up to 100Mbps for a flat monthly rate with no data overage charges. AT&T Wireless Broadband also includes AT&T Business Fast Track with a specific data allotment which varies depending on the plan chosen.

AT&T Wireless Broadband offers a cost-effective, rapidly deployable connection for data traffic from your ATM terminals to your data center. And, you can combine it with AT&T Private Mobile Connection for a virtual private network to provide higher security for the confidential data. (AT&T Private Mobile Connection isn't available on the 5G/5G+ network. However, Private Mobile Connection works with 5G devices and rate plans using our LTE network).

- **Retail Point-of-Sale Connectivity**

You want redundancy for the point-of-sale network at your retail locations. However, most back-up/redundancy options are too expensive.

To cost-effectively back up your point-of-sale network, we suggest a cellular data connection.

AT&T Wireless Broadband provides on-demand connectivity using the AT&T 5G/5G+ and 4G LTE networks. (5G/5G+ requires a compatible 5G/5G+ device and plan and may not be available in your area. 5G+ is only available in limited parts of select cities. See [att.com/5Gforyou](http://att.com/5Gforyou) for details.) With speeds up to 100Mbps, the AT&T Wireless Broadband Ultra plan can power a compatible router that will serve as your primary or failover network. Alternatively, you can choose AT&T Wireless Broadband Core or AT&T Wireless Broadband Pro, both of which offer lower maximum speeds. And, you can combine it with AT&T Private Mobile Connection to increase the protection of your data via a highly secure virtual private network. (AT&T Private Mobile Connection isn't available on the 5G/5G+ network. However, Private Mobile Connection works with 5G devices and rate plans using our LTE network).

When used as a back-up/redundancy option, AT&T Wireless Broadband can help keep your critical point-of-sale applications connected if your primary wired network fails. As a result, this solution can help reduce lost revenue.

- **Temporary Internet Connections for New Locations**

Your business is rapidly expanding into new territories. To gain traction in an aggressive market, you want to activate these new locations quickly, without having to wait for construction of new infrastructure and telco facilities.

To quickly connect your new locations, we suggest a router with a cellular data connection.

AT&T Wireless Broadband offers wireless data connectivity at a flat monthly rate for a compatible router or mobile hotspot device. Three rate plans are available with different maximum speed and pricing, all with no data overage charges. Each plan includes an AT&T Business Fast Track allowance (15GB, 30GB or 50GB per month, depending on the selected plan).

With AT&T Wireless Broadband, you can quickly and easily establish a market presence at your new construction site before your wired telco infrastructure is ready. After the construction of wired telco infrastructure is complete, you can easily transition your router or mobile hotspot powered by AT&T Wireless Broadband to a failover solution.

- **Digital Signage Connectivity**

You're deploying standalone digital signage in remote locations as part of a new marketing campaign. The graphics need regular updates, but the signs are in third party venues or other locations where network connectivity is limited.

To economically connect your digital signage for periodic updates, we suggest a router with a cellular data connection.

AT&T Wireless Broadband offers wireless data connectivity at a flat monthly rate for your compatible router or mobile hotspot device. Three rate plans are available with different maximum speed and pricing, and you don't have to worry about data overage charges.

AT&T Wireless Broadband can provide on-demand connectivity for your signage in standalone and remote locations by using the AT&T 5G/5G+ and 4G LTE networks. (5G/5G+ requires a compatible 5G/5G+ device and plan and may not be available in your area. 5G+ is only available in limited parts of select cities. See [att.com/5Gforyou](https://att.com/5Gforyou) for details.) So, you can avoid having to depend on an expensive host solution or special wired construction to establish connectivity.

- **Failover for Your Primary AT&T VPN**

You use AT&T VPN for your primary network connection. You're looking for a cost-effective failover solution that meets the budget for your small offices.

To add redundancy to your small offices, we suggest a router with a cellular data connection.

AT&T Wireless Broadband offers wireless data connectivity at a flat monthly rate for your compatible router or mobile hotspot device. Three rate plans are available with different maximum speed and pricing, all with no data overage charges. Each plan includes an AT&T Business Fast Track allowance (15GB, 30GB or 50GB per month, depending on the selected plan). AT&T Wireless Broadband enables connectivity using the AT&T 5G/5G+ and 4G LTE networks (5G/5G+ requires a compatible 5G/5G+ device and plan and may not be available in your area; 5G+ is only available in limited parts of select cities; see [att.com/5Gforyou](http://att.com/5Gforyou) for details).

You can combine AT&T Wireless Broadband with your AT&T VPN service and AT&T SD-WAN service (sold separately) to provide a complete solution for your enterprise by using AT&T Wireless Broadband as your backup. This solution is cost-effective and provides plenty of bandwidth for failover purposes. So, combined with your primary AT&T VPN service and AT&T SD-WAN service, AT&T Wireless Broadband can provide diverse network options with the convenience of a single provider and service contact.

## Graphics

- **AT&T Wireless Broadband Monthly Plans**

We designed these wireless data plans with your business-essential applications and budget in mind. You can choose from three plan options—AT&T Wireless Broadband

Core, AT&T Wireless Broadband Pro, and AT&T Wireless Broadband Ultra—all with no overage charges.

Choose an AT&T Wireless Broadband plan for your eligible router or mobile hotspot device				
Monthly plan prices below are after AutoPay and paperless bill discount.*				
Plan <sup>1</sup>	Monthly service charge*	Data	Data restrictions	AT&T Business Fast Track allowance <sup>3</sup>
AT&T Wireless Broadband Core	\$65	Unlimited	Data speed up to 25 Mbps. After 100GB, AT&T may temporarily slow data speeds if the network is busy	15GB
AT&T Wireless Broadband Pro <sup>2</sup>	\$75	Unlimited	Data speed up to 50 Mbps. After 125GB, AT&T may temporarily slow data speeds if the network is busy	30GB
AT&T Wireless Broadband Ultra <sup>2</sup>	\$95	Unlimited	Data speed up to 100 Mbps. After 175GB, AT&T may temporarily slow data speeds if the network is busy	50GB

**Fees extra.**

\* **Advertised monthly pricing is only for new plans currently offered to customers as of February 15, 2023.** Brochure does not reflect retired plans available prior to that date. **What you will see on your bill:** Advertised monthly pricing includes (a) a monthly plan charge for data service (\$70, \$80, or \$100, depending on the plan), and (b) a \$5 monthly discount when enrolled in both AutoPay & paperless billing, which starts within 2 bills after enrollment.

<sup>1</sup> Data throughput speeds are capped at a maximum available data speed, which may not provide you with the highest speed available in a location at a specific point in time. **Each plan's "up to" data speed is not guaranteed to be your actual speed. Actual speeds vary and may be affected by a number of factors, including your proximity to a cell site, the capacity of the cell site, the number of other users connected to the same cell site, the surrounding terrain, AT&T network management practices, the applications you use, and your in-building coverage.**

<sup>2</sup> Data throughput speeds of up to 50 Mbps and up to 100 Mbps require a wireless router or mobile hotspot device with a Category 18 or higher modem and use where enhanced AT&T 4G LTE-Advanced service or 5G and/or 5G+ service is available.

<sup>3</sup> Feature is available (up to applicable feature allowance) for eligible data originating on and traveling over the AT&T-owned domestic 4G LTE network. Feature does not prioritize your data ahead of all other data, which may receive similar or higher priority level, or provide priority network access or preemption capabilities. Other restr's apply.

## Important Information

AT&T Wireless Broadband: Wireless service subject to applicable Business Agreement. Plan prices can vary. Taxes, fees, monthly, other charges, usage, speed, coverage & other restr's apply per line. See [att.com/mobilityfees](https://att.com/mobilityfees) for details on fees & charges. Purchase, financing & other limits & restrictions apply. Pricing, promotions, programming, terms & restrictions subject to change & may be modified or terminated at any time without notice.
