For avoidance of doubt, the Verizon Wireless 5G Nationwide network is a separate network from the Verizon Wireless 5G Ultra-Wideband network.

Usage outside of the United States requires a World-capable smartphone and will be billed at the international travel feature rate, if applicable, or pay as you go pricing, which can be found at [www.verizonwireless.com/international](http://www.verizonwireless.com/international). <sup>1</sup>The international travel data allowance applies in the rest of the world where coverage is available; aircraft and cruise ship data usage is not included. Lines activating on this plan must be on 5G Ultra-Wideband-compatible, 5G Nationwide, or 4G LTE smartphones. <sup>2</sup>Data usage on this plan is not subject to speed reductions (“throttling”) within a given billing cycle. However, in the event data usage exceeds 25GB each billing cycle for three (3) consecutive billing cycles, data throughput speeds will automatically be reduced to 600kbps for data usage exceeding 25GB per billing cycle on a go-forward basis. Data usage for actively engaged and deployed fire, police, emergency medical technicians, emergency management agency, and assigned federal law enforcement users on this plan will not be subject to speed reductions regardless of data usage during any billing cycle. <sup>3</sup>A 5G device is required to receive 5G Ultra-Wideband (UWB) service. To ensure users are able to maximize their high-speed data use for business applications, video applications will stream at up to 480p while on 4G LTE and 5G Nationwide network areas; and, will apply video streaming up to 4K when on 5G UWB network service areas. <sup>4</sup>Includes domestic toll-free calling and toll-free calling from the United States to Canada and Mexico. <sup>5</sup>Unlimited messaging from within the United States to anywhere in the world where messaging services are available. For other messaging rates go to [www.verizonwireless.com](http://www.verizonwireless.com). This plan includes Domestic Mobile Broadband Priority and Domestic Preemption. Mobile Broadband Priority allows customers to connect to the network with priority by leveraging a pool of radio resources dedicated to enable their connection. Mobile Broadband Priority identifies the user with an Access Priority setting, giving them higher priority for network access than lower Access Class users. Preemption automatically activates to provide approved personnel uninterrupted access to the network in those uncommon times when the network is fully utilized. 911 calls are never preempted. **This plan is available to National Security, Public Safety, and First Responders customers only as defined by the following NAICS (formerly SIC) Codes:**
