Account Executive

The Account Executive has overall ownership for the business relationship between VITA and Atos. As the leader of the Atos Account Management Office, the Account Executive is 100% dedicated to the VITA account.

Project Executive

Atos Project Executive will be the final escalation point for operational issues and also the privileged point of contact for exceptional or priority events. The Project Executive has responsibility for operational delivery of services and is accountable for service level performance. The Account Manager reports directly to the Project Executive.

Account Manager

The Account Manager will be the single point of contact for all things related to service delivery and quality. The Account Manager will be 100% dedicated to the delivery of services for VITA. The Account Manager is also referred to as a Service Delivery Manager (SDM) within Atos.

Transition Project Executive and Director

The Transition Project Executive will have ultimate responsibility and will be involved at a Steering Committee level and oversee the transition efforts. VITA will also have a specific Transition Project Director who will have ownership of the delivery and day-to-day activities of the Transition Project. The Transition Project Executive will serve as the escalation point for all transition related activities.

Continual Service Improvement Manager

The named individual as the Continual Service Improvement Manager serves as the single point of contact for VITA. The Continual Service Improvement Manager will leverage our centralized Continual Service Improvement team that is tasked with leading service improvement activities across all of our Public Sector accounts.

Chief Security Architect

The Chief Security Architect is a dedicated resource that will be responsible for ensuring security technologies align and meet VITA's requirements. This resource will coordinate with Atos resources or third parties on behalf of Atos to ensure solutions meet the security architecture, and security design, and do not introduce risk. This resource will work with the Information Security Manager to provide technical consultation and escalate security-related issues.

Information Security Manager

The Information Security Manager is a dedicated resource that will be responsible for ensuring security policies meet VITA's requirements. This resource will review systems in order to identify potential security weaknesses, recommend improvements to amend vulnerabilities, implement changes and document upgrades. The Information Security Manager is also known as Information Systems Security Officer (ISSO) within Atos.

Chief Operations Manager

The Chief Operations Manager will coordinate with Atos resources or third parties on behalf of Atos to ensure that security SLAs, KPIs, and audit requirements are met. This resource will be your primary contact for providing and receiving security-related issues.

Lead Business Relationship Manager

The Business Relationship Manager is the “Voice of the Customer” back into Atos and as such plays a critical role which requires collaboration & communication with internal teams to successfully deliver services for the VITA enterprise environment. The Business Relationship Manager (BRM) is responsible for maintaining positive relationships with the Agencies, project oversight, and ensuring high customer satisfaction. The BRM will work closely and in sync with the MSI team. The BRM is also referred to as a Customer Service Manager within Atos.

Chief Architect

The Chief Architect will be a leveraged resource that will be assigned to support the delivery of services for VITA. This Chief Architect has exposure to several other accounts and technologies, which will be helpful for planning architectural changes and in resolving complex issues.
